DETAILED ACTION

Status of Claims

Claims 1-3 and 5-8 are pending in this application.

Claim 4 was previously cancelled.

Response to Amendment

There is no newly filed amendment in this case.

Response to Arguments

Applicant's arguments filed January 25, 2008 have been fully considered but they are not persuasive. Applicant argues that the preamble should be given weight since it is a part of their invention and gives the claimed compound organoleptic properties.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1 and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abramov et al (Zhurnai Obsheci Khimii (1952), 22, 1450-1457).

Applicant claims a compound that has been taught by Abramov et al. The claims use the preamble "fragrancing material" and/or "fragrancing application". The Examiner contends that since the compound has been taught and since those phrases are indeed in the preamble of the claims, the rejection will be maintained.

Applicant also argues that the Double Patenting rejection is premature and should be withdrawn.

The Examiner agrees that the double patenting rejection may be premature and submits that a provisional double patenting rejection must be put on the record. A provisional rejection is when claims are copending with another application.

Double Patenting

Claims 1-3 and 5-8 of this application conflict with claims 6-10 of Application No. 10/572,804. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 1621

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 and 5-8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 6-10 of copending Application No. 10/572,804. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds claimed are overlapping in scope.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
